Tranquility Series

Bring a sense of calm to your environment

BalancedCare by Axis Lighting understands how biophilic design positively impacts a patient's state of mind by bringing the outdoors in.

Introducing Tranquility Series, a collection of BalancedCare luminaires integrating a range of inspiring images enabling design freedom and promoting wellness, serenity and faster recovery times.

Form meeting function - it's in our DNA.

Tranquility Series

In healthcare facilities, nature scenes and other imagery are known to lessen anxiety, improve mood and enable shorter hospital stays. There are opportunities for “positive distractions” by bringing in playful, colorful images to an otherwise stressful environment.

A sense of calm

Tranquility Series leverages a wide variety of uplifting, aesthetic images seamlessly applied over BalancedCare luminaire optics. The aim is to reduce stress and foster healthier outcomes.

Luminaire options

With Tranquility's broad selection of appealing images and textured patterns – and wide choice of wall-mount and ceiling-mount luminaires and layout possibilities – you have the flexibility to meet the needs of any environment.

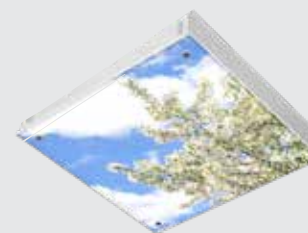

- > Choice of CCT:
2700K, 3000K, 3500K, 4000K
- > Axitune® Tunable White options:
2700K – 5000K or 2700K – 6500K

Patent Pending Drop Lens

Our patent pending Drop Lens is unlike any other luminaire in the healthcare sector. With its 2'x2' footprint, crisp corners and uniform glow, it lets you design stunning luminous ceilings by playing with illuminated volumes. While adding interest to the ceiling line, Drop Lens also adds a layer of brightness to adjacent ceilings and walls. Tranquility Drop Lens configurations feature wrap-around imagery and a choice of eight lens depths.

Exclusive 3D optics ideal for creating distinctive luminous ceilings

Create a 3D ceiling that captivates and inspires. Play with the different lens depths to deliver a fresh, unique approach to the ceiling profile.

- > 2'x2' Dimension
- > Lens depths from flush to 7" in 1" increments
- > Recessed housing less than 5" deep
- > 3000 lumens*
- > Compatible with 9/16" and 15/16" grids

7"

Design Flexibility

The Drop Lens family provides design flexibility, with lens options from flush to 7" depths. These can be field adjusted, to complement any application and add 3D interest to the ceiling.

*Lumens based on standard luminaire without graphics. The addition of Tranquility graphics will reduce output.

How to Specify

01

Decide on your layout

The Tranquility Drop Lens comes in various lens depths. Select the depths for your design.

Tranquility Series is easy to specify. Simply follow the four-step process. Once the configuration is determined, our standard images can be cropped to fit the desired format. We can customize the pattern to achieve the exact look for each pattern.

02

Select the image

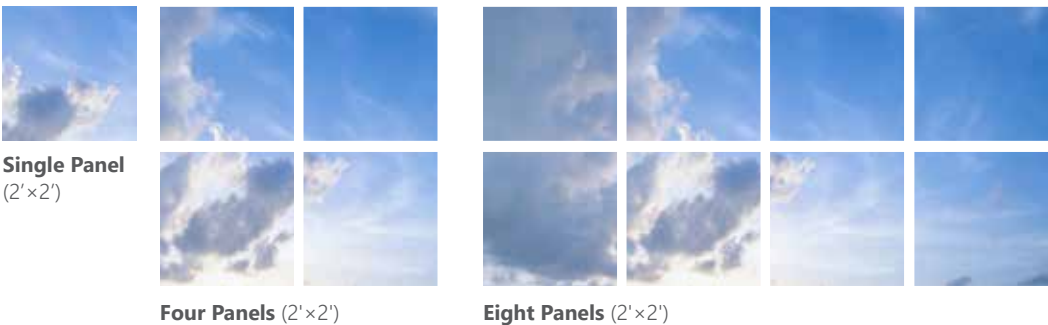

Select the image from our image gallery. (See page 23)

03

Review your proof

Send us your layout with identified depths and your choice of image and we will prepare a proof for your final approval.

04

Enjoy
the final
installation!

DROP LENS

Overlay Grid

Overlay Grid lends itself to creating a central luminous ceiling as a focal point. With its minimalist square form, flush appearance and uniformly lit diffuser that conceals the grid, this Tranquility luminaire features dimmable ambient lighting while transforming multi-unit graphics into a single, continuous image.

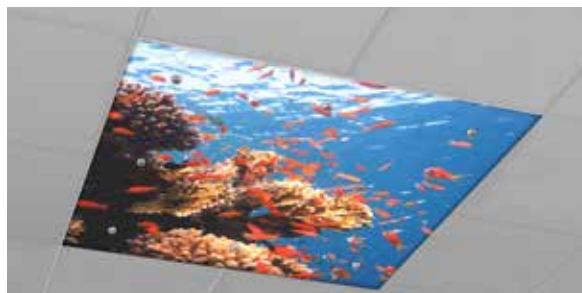

Clean, uninterrupted appearance

- > 2'x2', 4'x4' Dimensions
- > Recessed housings suited to shallow plenums:
 - 2'x2': 3 1/2" deep
 - 4'x4': 5 1/8" deep
- > Output: 2'x2' – 4000 lumens*, 4'x4' – 8000 lumens*
- > Compatible with 9/16" and 15/16" grids

OVERLAY GRID
BCTQG 2'x2'

OVERLAY GRID
BCTQG 2'x2'

OVERLAY GRID
BCTQG 4'x4'

Clean appearance when installed side-by-side, fully concealing T-bars. Decorative fasteners made of brushed aluminum.

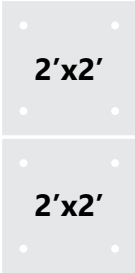

*Lumens based on standard luminaire without graphics. The addition of Tranquility graphics will reduce output.

How to Specify

01

Decide on your layout

The Overlay Grid conceals the T-bar, so a single image can cover a multi-unit array. It comes in two sizes 2'x2' and 4'x4'.

OVERLAY GRID

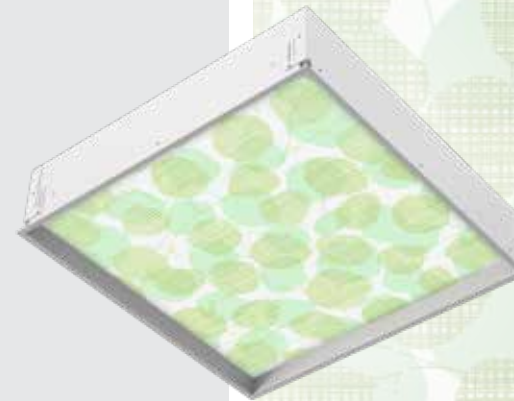

Regressed Lens

Features an elegantly regressed lens that suggests a skylight appearance. Choose from two Regressed Lens options to provide a low profile, elegant architectural effect. When coupled with a beautiful designer pattern, it appears to float in the ceiling.

Skylight appearance

- > Regressed lens to enhance skylight effect
- > Easy-to-remove lift'n'shift lens – no visible latches
- > 2'×2': 2100 lumens*, fits 15/16" and 1.5" grids
- > 2'×4': 5400 lumens*, fits 15/16" and 1.5" grids

Tranquility Sconces

Tranquility Sconces let you add soft layers of light to complement any environment. Sconces can be dimmed when desired to provide ambient lighting and wall glow.

Creating soft layers of light

- > Horizontal or vertical orientation, surface mounting in multiple lengths.
- > Amber nightlight option helps with nocturnal wayfinding.
- > Detachable backplate for quick-disconnect and room-side access to driver.
- > Shallow depth:
 - Closed Book – 3 1/8"
 - Open Book – 2 3/8"
 - Box – 2"

Tranquility Series Graphics Gallery

Naturally, the lighting should enhance the space while providing a sense of calm or a boost of energy, depending on the mood you're trying to create. There are opportunities for 'positive distractions' through color changing lighting, illuminated panels, and nature graphics.

Select from the images on the following pages, or contact us for other options. Bring the outdoors in with complete design freedom.

Custom image options are also available. Please refer to page 42 for more information.

Custom Images

In addition to providing a wide variety of high-resolution images, we have the ability to customize Tranquility luminaires by integrating client-supplied artwork, including photography, company logos and signage. Use this opportunity to create unique graphic themes, increase brand awareness and transform the visual environment.

Use your artwork to customize the environment

Send us your artwork and we will print it. Art supplies must be 150 dpi at 100% image size.

TQC(#)

CLIENT-SUPPLIED IMAGES

Personalize your space - Add images of local scenes, landmarks or special events that connect people with their surroundings.

TQC(#)

LOGO

Highlight your brand - It will enhance the colors of your logo and leave a long lasting impression.

TQC(#)

SIGNAGE

Improve wayfinding - Make room numbers easier to see and destinations easier to find using illuminated signage.

Listings and Technologies

ADA Compliant — Objects projecting from walls (e.g. sconces) shall protrude no more than 4" into walks, halls, corridors, passageways or aisles

CCEA Approved — The City of Chicago Environmental Air (CCEA) rating ensures that the luminaire is inherently airtight. Wiring and/or branch circuit terminations are sealed off and gasketed from the plenum air space. This listing ensures that the luminaire is sealed to limit air flow from the room side to the plenum.

IC — Insulated Ceiling (IC) recessed lights are rated for direct contact with insulated ceilings or, that is, they can be installed in contact with combustible material or blanketed with thermal insulation.

NSF2 — Denotes that the luminaire has been evaluated for corrosion resistance, cleanability and the ability of exposed material to withstand normal wear. This supports the infection control standards established by healthcare.

UL/CUL Listed — All BalancedCare luminaires have been tested to be in compliance with Underwriter's Laboratory (UL) performance standards. UL is a world leader in product safety testing and certification.

BeWell™ Technology — takes a systems approach to ensure seamless integration between the luminaires, sensors, control devices and users. It also provides multiple LED platforms for the entire series - including spectral programmability provided by tunable white technologies.

POE — Power over Ethernet (POE) delivers both lighting power and data transfer on one low-voltage wire, and enables communication with multiple building systems using Ethernet protocol, along with many types of sensors. All BalancedCare luminaires are UL Listed 2108 for POE compatibility.

Axitune® Tunable White — Tunable white technology enables the user to independently control both color temperature and intensity of light within a given application. This provides the ability to change the color of light from warm to neutral to cool in appearance, over time, based on the needs of the occupant or the space.

Since our founding in 1991, Axis Lighting has always been a family-owned company, with an emphasis on people. Our diversity translates into architectural designs that transcend the ordinary and performance that exceeds the norm. We've taken our balanced approach to lighting into the healthcare market to provide solutions that not only function properly, but also provide beautiful, timeless design for all users of the space.

Form meeting function – it's in our DNA.
